Art Unit: 1773

DETAILED ACTION

1. Claims 9-17, 19, 26 have been cancelled by Applicant.

Election/Restrictions

2. The restriction requirement in the previous Office Action mailed 10/4/2006 has been withdrawn in view of Applicant's Amendments filed 11/6/2006.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 21-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 21-24, the term "low outgas thermoplastic" in claims 21, 22, 24 is a relative term which renders the claims indefinite. The term "low outgass" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Allowable Subject Matter

5. Claims 1-8, 18, 20, 25, 27-28 are allowable over the prior art of record.

6. Claims 21-24 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fails to disclose or suggest: (1) a method of securing a pellicle frame to a reticle comprising securing a pellicle between an inner pellicle frame and outer pellicle frame by means of heating the pellicle components to the specified temperature range, securing the inner pellicle frame to a reticle by heating an intervening polymer layer, wherein the inner pellicle frame has a coefficient of thermal expansion equal to or greater than the outer pellicle frame (claim 1); (2) a system comprising a flexible pellicle membrane, a pellicle frame assembly comprising an inner frame and outer frame which mechanically secure and stretch the pellicle membrane across the assembled frame, and an thermoplastic layer adhering the inner pellicle frame to a reticle while the outer pellicle frame remains unattached to the reticle, wherein the inner pellicle frame has a coefficient of thermal expansion equal to or greater than the outer pellicle frame (claim 27). SHIRASAKI '650 and IKEDA ET AL '019 and EYNON '754 fail to disclose the recited combination of pellicle components with the recited relative CTE values.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
